

the pro clima way

Your Home

pro clima
SOLITEX EXTASANA
Optimum protection against leaky building syndrome

German-engineered for all Australian Climates

Ensuring a Healthy, Durable and Energy-efficient Home.

Making Your Home Healthy

pro clima's systems reduce the risks posed by moisture and condensation within your home. Both can cause mould growth in your walls and roof space, which leads to significant health problems such as sick building syndrome. We look after the moisture for you, so you can look after your family.

Making Your Home Durable

pro clima's systems protect your home from the harsh Australian climate. Keeping the structure of your home dry ensures that it will stand the tests of time, for years to come. At pro clima, we believe homes should last for generations.

Making Your Home Energy-efficient

pro clima's systems reduce the amount of energy needed to heat and cool your home. Reducing air leaks through your walls and roof keeps your home warmer in winter and cooler in summer. You can save money, and reduce your carbon emissions at the same time.
