

Fleece for covering cracks and joints

AEROSANA FLEECE is a supplementary product for working with spray-on or brush-on seals from the AEROSANA VISCONN family. It can be used to reliably cover cracks or joints that are wider than 3 mm in the case of AEROSANA VISCONN or 20 mm in the case of AEROSANA VISCONN FIBRE. It is very useful for difficult junctions in mass timber, timber frame, commercial steel frames, concrete and masonry constructions.

- ✓ Reliable airtightness and windtightness
- ✓ Particularly effective on junctions & detailed features
- ✓ Very malleable fleece material
- ✓ Excellent values in hazardous substance test

Fleece for covering cracks and joints

Technical Data

Material	PET
Colour	White
Surface weight	63 g/m ²
Thickness	0.7mm
Tensile strength MD/CD	90 N/5 cm / 145 N/5 cm
Elongation MD/CD	75% / 90%
Application temperature	5°C to 60°C
Coverage	3.75 m ² /Roll

IMPORTANT INFORMATION

- Airtightness even with geometrically challenging joints
- Seal pipes and other penetrations
- Holes of up to 70mm diameter can be sealed

WEATHER EXPOSURE

Suitable to use outdoors in protected areas in accordance with the AEROSANA® VISCONN system

APPLICATION NOTES

AEROSANA FLEECE can be used on subsurfaces that are slightly uneven and/or structured. To achieve airtight and/or windtight installation it is important that AEROSANA® FLEECE is coated with AEROSANA® VISCONN or AEROSANA® VISCONN FIBRE on both sides in the area where it is in contact with the subsurface.

Recommendations for subsurfaces that AEROSANA® VISCONN products can be used on can be found in the relevant application recommendations.
